Education & Skills

Asia Pacific University, Taman Teknologi Malaysia, Kuala Lumpur

Diploma in Electrical and Electronic Engineering, 3.81 CGPA

September 2020 – June 2023

Bachelor of Mechatronic Engineering with Honours

November 2023 – Present

Technical Skills: SolidWorks, AutoCAD, MATLAB, LTSpice, CX Programmer, NB Designer, Python, C, Node Red, RPi

Interpersonal Skills: Leadership, Problem Solving, Time Management, Fast Learner, Communication, Conflict Resolution

Work Experience

Project Engineer Intern (Industrial Automation), Excinnno Sdn Bhd – Puchong, Selangor

April 2023 – June 2023

- Programmed **PLCs (Ladder Logic)** for Minox Valve's exhibition project, automating control of 3 types of valves via HMI with animated diagnostics, improving operational efficiency by 25%.
- Designed **BEM-compliant control panels** (tb, cb) through optimized schematic diagrams.
- Tested and troubleshooted electrical panels (Colgate, Barry Callebaut), diagnosing faults.
- Updated wiring diagrams (Carlsberg, Petronas), reducing future installation errors.

Engineer Intern/Part-time (R&D & Operations), Superdough Sdn Bhd – Kuala Lumpur

Sept 2025 – June 2026

- Solely **managed technical operations across 5 outlets for 3 months** while engineering team was overseas in Canada, diagnosing and resolving issues with no on-site support achieving 97% uptime across all rooms.
- **Conducted 1000+ test iterations to improve RFID reliability from 70% to 95%+**, documenting 14 optimization phases and solving multi-variable engineering challenges.
- **Built 14+ brainbox control systems** (RPi, Node-RED, MQTT, relays, sensors) and **coded 3 complete escape room sequences** from scratch for international deployment to Montreal, Canada.

Entrepreneurial Experience

TechSparks Edu | Founder

2024

- Developed and taught Arduino programming curriculum to 50+ students aged 7 – 14.
- Partnered with GlobalArt Damansara to deliver workshops and secured Atria Mall Collaboration.
- Managed all operations including marketing, curriculum development, and logistics.

E-Commerce Venture | Founder

2023 - 2024

- Built profitable online business generating **RM100k** revenue in 8 months.
- Scaled operations by hiring and managing a team of 3 freelancers.
- Developed partnerships with other sellers to expand inventory.
- Gained experience in financial management, operations and market analysis.

Projects

Intelligent Nursing System | Robotics Designer / Engineer

2013

- Engineered medication-dispensing robot with Bluetooth alert system.
- Tested prototype with elderly patient, improving medication adherence.
- Awarded **APICTA National Winner** and International Merit, Hong Kong 2013.
- **Special Jury Award** at the 26th MSC Malaysia Implementation Council Meeting, presented by **Datuk Seri Najib Razak**

Flood Alert App | Programmer / Designer

2019

- Created flood warning application with MIT App Inventor
- Implemented SOS signal and last-seen location features
- **Won 3rd place** in MyDigitalMaker Fair (RM 1,500 Prize), 1st place in SMK Taman SEA ICT Fair.
